SWITZERLAND'S NEW ENERGY LAW

OWN CONSOMMATION

NEW SINCE 2018

POOLING FOR OWN CONSUMPTION

OWN CONSOMMATION IN THE LAW – POOLING 1/2

Art. 17 Pooling for own consumption

¹ If several landowners are final consumers at the place of production, they can join together for their own consumption, provided that the total production output in relation to the connected load at the measuring point is considerable...

Participation of tenants can be provided by the landowner, Tenants can only defend themselves against the introduction of the Pooling

→ Landowner assumes responsibility for electricity supply!

OWN CONSOMMATION IN THE LAW – POOLING 2/2

Art. 18: Relation to DSO

Art.1 Following the pooling, final users will have a common single point of measurement with the DSO...

Pool is single **final consumer of** DSO:

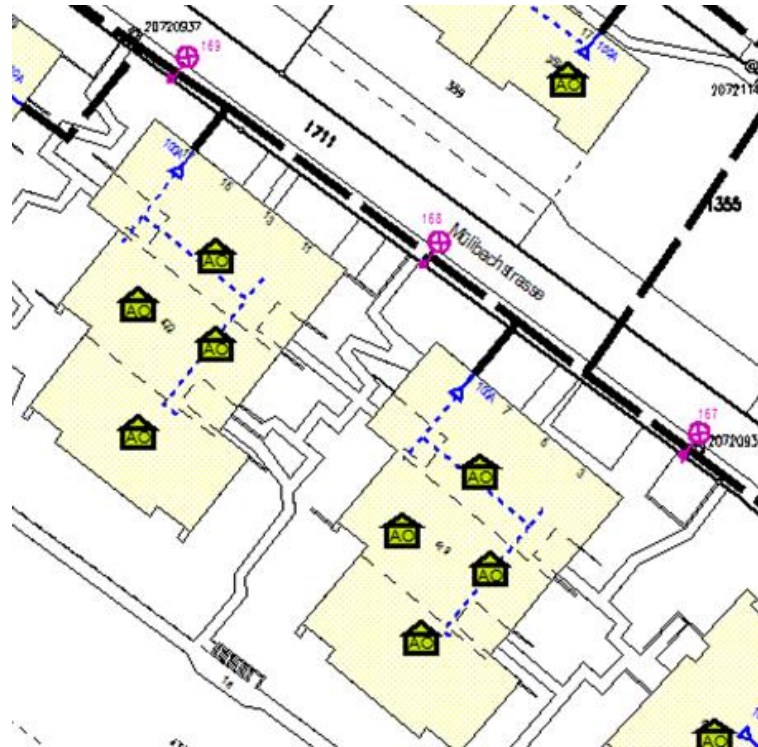

- Single measuring point of DSO
- Pool is responsible for internal metering and billing
- Switzerland's electricity market is only partly liberalised (≥ 100 MWh consumption / year):
 - Pool can change electricity supplier if consumption is higher

OWN CONSUMPTION IN THE REGULATION- POOLING 1/2

Art. 14 Place of production

Land with production plant and adjoining land without using the public network

OWN CONSOMMATION IN THE REGULATION- POOLING 2/2

Art. 15 Condition for Pooling

The production facility must have a power of at least 10% in relation to the connected load at the measuring point of the pool

Art. 16 Tenants and lessee participation

Landlord charges actual costs:

- Internal production: costs for capital, O&M, metering, data handling, administration, billing
- costs für elektricity from grid
- Income from feed-in must be deducted
- ...
